# Arizona's Internet Inequity

## SPEED MATTERS

## THE DISCONNECTED

Digital equity is achieved when everyone has access to the internet and the computer skills needed to thrive online. However, many people are left without reliable internet, devices, or skills to be successful in society, democracy, and the economy.

Today's world requires reliable connectivity to support a variety of online activities.

Minimum speed needed to access most websites and online resources:

25 Mbps  3 Mbps 

BUT THESE SPEEDS ARE NOT AVAILABLE TO EVERYONE.
